Education

Manipal University Jaipur	September'22 – Present
<i>B. Tech CSE – CGPA: 7.01</i>	
Venkateshwar International School	April'21 – March'22
<i>CBSE (Grade XII) – 76%</i>	
Venkateshwar International School	April'19 – March'20
<i>CBSE (Grade X) – 83.2%</i>	

Work Experience

Nucleus Software Software Developer Intern (on-site) Delhi	May'25 – Aug'25
- Engineered a portfolio of three enterprise fintech applications to automate financial data analysis and resource management for 12 company clusters, replacing high-error, manual Excel processes. - Established a key data reconciliation feature that cross-referenced projected, accrual, and system allocation data for over 500+ employees, providing senior leadership with resource utilization and data integrity. - Architected a secure full-stack solution (Java Spring Boot, React) to process and manage a high-volume Oracle database with over 1,000,000 financial records, optimizing queries to achieve millisecond data retrieval speeds. - Designed and deployed role-based dashboards for 8 Project Managers, providing secure, tailored access to sensitive financial and personnel data, reducing manual reporting time by an estimated 95%.	
Nagarro Software Developer Intern (on-site) Dubai, UAE	May'24 – July'24
- Achieved a 15% increase in React-based UI performance and a 10% reduction in page load times by implementing robust state management, optimizing front-end assets, and refactoring code for a more efficient, component-driven architecture. - Enforced OWASP Top 10 security protocols to mitigate vulnerabilities and strengthen overall application security. - Optimized project delivery by implementing Agile sprints, leveraging Git for precise version control, and fostering robust team collaboration.	

Projects

Smartsolve AI:	- Created a React.js and Flask-based AI-powered web app, integrating Gemini API and Redux for state management, improving query resolution speed by 40%. - Prepared a modular front-end using REST APIs, Redux and React Hooks for efficient state management. - Implemented robust OAuth 2.0 authentication aligned with OWASP standards to ensure high-level security.
Nexpend - AI powered Financial Tracking System:	- Implemented an AI-integrated web application for automated financial document processing and transaction querying. - Leveraged Tesseract OCR to extract financial data from scanned bills, cheques, and receipts, storing results in a structured Oracle database. - Improved financial data entry efficiency and accuracy by automating manual processes, reducing human error significantly.
Career Coach (In progress):	- A full-stack AI Career Coach, designed to provide personalised career guidance, 24/7 mock interviews, and AI-powered resume-building tools through Gemini AI, reducing reliance on human career counsellors by up to 90–100%. - Real-time AI-driven features include interactive dashboards and intelligent onboarding workflows that deliver actionable insights, cut manual effort in career planning by 80%, and enhance user engagement. - Responsive, scalable UI components with Shaden UI and Tailwind CSS ensure 100% cross-device compatibility, intuitive navigation, and a seamless user experience optimised for future feature integration and platform scalability.

Skills

Programming Language: C++, Python ,Object Oriented Programming using Java,HTML,CSS, JavaScript.
Framework and Libraries: Java Springboot, React, Redux, Flask, Node.js, Bootstrap, Tkinter, XGBoost, LightGBM, Random Forest
Database: MySQL,MongoDB,PostgreSQL
Tools and Software: Git , Power Bi , Postman , Docker , AWS , Excel
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems, Computer Architecture, Automata Theory & Compiler Design, Object-Oriented Programming, Software Engineering, Computational Intelligence

Certifications

Oracle: Java Foundations – Covered Java programming fundamentals
IBM: Generative AI Fundamentals
AWS: Cloud Practitioner Essentials

Extra-Curricular

Association of Computer Machinery (ACM)	Oct'22 – Sept'24
- Advanced from an organizing committee member to a leadership role in the organizing committee at ACM, leading a team of 10+ members. Engaged stakeholders across platforms, driving 1,500+ event interactions. - Coordinated team to improve collaboration and boost event participation by 30%, demonstrating leadership and project management.	
Solved 200+ problems across all coding platforms.	
Advanced to the second round of Smart India Hackathon with a team of 5, developing a Crop Price Prediction model to support farmers in optimizing selling prices.
