

MAANAV GHAI

Java Full-Stack Developer | Java • Spring Boot • Angular • SQL • Spring AI

+91 9560186823 | maanavg14@gmail.com | github.com/maanav098 | linkedin.com/in/maanavghai | maanav-ghai-portfolio.vercel.app

Summary

Java full-stack developer (B.Tech CSE, 2026) with Infosys experience building Spring Boot microservices, Angular features and a RAG-based AI feature, plus internships at Nucleus Software and Nagarro. Strongest in backend: Java, Spring Boot and SQL.

Skills

Languages: Java, Python, TypeScript, SQL, PL/SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Swagger/OpenAPI, Microservices, API Gateway, JWT, FastAPI, Flask

Frontend: Angular, React, HTML, CSS, Tailwind CSS

Databases: MySQL, Oracle, MariaDB

AI: Spring AI, RAG, Vector Search (MariaDB), Ollama (Llama3), Embeddings (nomic-embed-text), Prompt Engineering, spaCy

Core CS: Data Structures & Algorithms, OOP, DBMS

Testing & Tools: JUnit, Mockito, SonarQube, Git, Maven, Postman, Jira, Agile/Scrum

Work Experience

Infosys | Digital Specialist Engineer (Java Full-Stack)

May 2026 – Oct 2026

(On-site) Mysore, India

- Worked on Infy LearnX, an internal learning platform built with Java 21, Spring Boot microservices and Angular, with services routed through an API Gateway
- Acted as Scrum Master for a 4-member team: ran sprint planning and daily stand-ups, split features into tasks, tracked progress and coordinated code reviews
- Implemented JWT-based login and role-based access control with Spring Security, and fixed mismatched request/response DTOs between 8 backend services
- Built a certificate-generation feature: issues a certificate on course completion, blocks duplicates and supports public verification by ID; wrote 22 JUnit tests for it
- Added an AI help feature using Spring AI with retrieval-augmented generation (RAG): course content is stored as embeddings in MariaDB and the most relevant sections are retrieved to answer learner questions

Nucleus Software

(On-site) Delhi, India

Software Development Engineer (SDE) Intern

Mar 2026 – May 2026

- Added business validations to 4 components of the rule engine (rule, condition builder, parameter and rule-detail tables) in a Loan Origination System (LOS) used by a Mumbai-based bank
- Wrote PL/SQL validation logic and tested changes against client scenarios before handover
- Joined client calls to clarify requirements, shared progress updates and ran a knowledge-transfer session on the changes

Project Intern

May 2025 – Aug 2025

- Built three internal web tools (Java, Spring Boot, React) to replace Excel sheets used for tracking project finances and resource allocation across company clusters
- Worked with an Oracle database of 1M+ financial records, writing and tuning SQL queries so dashboard pages loaded quickly
- Built role-based dashboards used by 8 project managers to view project reports without preparing them by hand

Nagarro Mena LLC | Software Developer Intern

May 2024 – Jul 2024

(On-site) Dubai, UAE

- Worked on a React frontend, cleaning up state management and splitting large components to reduce unnecessary re-renders and improve page load
- Profiled and improved slow Python/Flask API endpoints, and fixed common security issues (input validation, error handling) based on OWASP guidelines

Projects

IntPrep – AI Interview Practice Platform (FastAPI, React, TypeScript, LLMs, Docker, AWS EC2)

- Shipped a full-stack interview platform (FastAPI, React/TypeScript), containerised with Docker on Terraform-managed AWS EC2
- Built two LLM grounding pipelines: company-aware question sourcing via web search cached per role and company, and resume-grounded generation with verbatim-substring checks that cut hallucinated citations from 12% to 1.6% over 25+ runs
- Added WorkOS OAuth2 login with role-based access, sandboxed code execution, Whisper voice answers and an in-browser code editor
- Built a recruiter view with an LLM-based JD analyser, applicant transcripts and a shortlist / hold / reject flow

Nexpend – Expense Tracker with OCR (Tesseract OCR, Oracle)

- Reads bills, cheques and receipts with Tesseract OCR and stores the amount, date and vendor in Oracle, removing manual data entry

Education

Manipal University Jaipur

Sept 2022 – May 2026

B.Tech, Computer Science Engineering | CGPA: 7.19

Certifications

Oracle: Java Foundations • IBM: Generative AI Fundamentals • AWS: Cloud Practitioner Essentials

Extra-Curricular

- ACM student chapter: moved from organising-committee member to a lead role, managing a team of 10+ volunteers
- Planned and promoted technical events and workshops, coordinating between design, content and logistics teams
